## Expenses

The Boston Science Partnership has been committed to lowering the barriers for student involvement and providing a high quality program for all students involved in the AP Science Support program. Below outlines the expenditures that the BSP has supported in each of the programs and the unit price. The prices have been estimated to help increase the usefulness of this information for others. Some prices increase as the number of students increase while others do not, like the amount per teacher stipend. Please note that none of these expenses take into account the time and effort required to coordinate these programs.

### APSI

- College Board Consultant (\$3,000)
- BPS Consultant (\$1,500)
